

THE Resurgence of Breastfeeding, 1975-2000 (Paperback)

By -

Wellcome Trust Centre for the History of Medicine at UCL, United Kingdom, 2009. Paperback. Book Condition: New. 230 x 188 mm. Language: English . Brand New Book ***** Print on Demand *****. As breast-milk substitutes became increasingly sophisticated and heavily marketed in the mid-twentieth century, bottle-feeding became regarded worldwide as safe, convenient, normal and even preferable to breastfeeding. From 1975, research conducted in the developing world, particularly Gambia, began to converge with work on immunology and child psychology to reassert the value of mothers own milk. At the same time, growing understanding of physiology, reproductive and developmental biology shifted interest from the composition of infant formulae to the biology of infant feeding. Insights from comparative zoology, dairy science and animal husbandry, shared with research in human lactation and naturalization of childbirth all helped to de-medicalize infant feeding. Chaired by Professor Lawrence Weaver, this Witness Seminar was attended by representatives from women s groups, pressure groups and international organizations, including Baby Milk Action, IBFAN, La Leche League, the National Childbirth Trust, WHO and UNICEF, as well as paediatricians, obstetricians, physiologists, nutritional scientists, zoologists, psychologists and members of industry. The discussion addressed the critical events, scientific advances, and social and political steps that drove...
