Excerpt: . . . anything, but they add to it a sort of proof, and as that proof is a practical one, and involves their own interests, it is the more worthy of attention. They return the kuckroo, which they have searched with the greatest care, back into the mine, in order to produce more diamonds; and they add that, after it has lain undisturbed for fifteen or sixteen years, they open it again with precisely the same chance of success, as if they opened a portion that had never before been touched. There is no reason why they should misrepresent the facts, because they can have no inducement to do so; and if they did not find the fresh turning of the same gravel productive, of course they would let it alone. This is a subject upon which it is impossible to come to any conclusion, because we know nothing of the process by which diamond is formed. We know, however, that it is pure carbon, or charcoal; that when burnt, it combines with oxygen, and a portion of pure carbonic acid, exactly equal in weight to the diamond and oxygen consumed, is the result. This being the case, we are quite sure that, if we could take a quantity of pure carbonic acid, and abstract from it all the oxygen that it contains, the remainder would be exactly the same substance as diamond; and as we know of no form under which carbon exists in nature,...
